HENGE

The house's location, architectural features, and ambient light are crucial factors in determining the direction and choices of an interior design project. The combination of these elements, along with the specific needs of the people who will reside in the house and the architect's proper interpretation, makes each project unique and functional. The Henge collection features a range of furniture and seating, each with its own unique personality. The collection highlights the use of distinctive materials meticulously researched, and crafted by hand by skilled Italian artisans. These timeless pieces of furniture effortlessly blend into various settings and add character and charm to any home. The collection for the year 2023 reaffirms the company's commitment to interior design that blends seamlessly with architecture. The lighting systems perfectly fill the spaces, while the HK "The Henge Kitchen" provides unexpected and sculptural elements. The boiserie systems also come with hidden surprises. All these features are highly customizable, making every Henge house unique and recognizable. Spiga 34 represents our idea of a constantly evolving home, it evolves every year with a common thread, reflecting Henge's attention to absolute quality and design.

Massimo Castagna

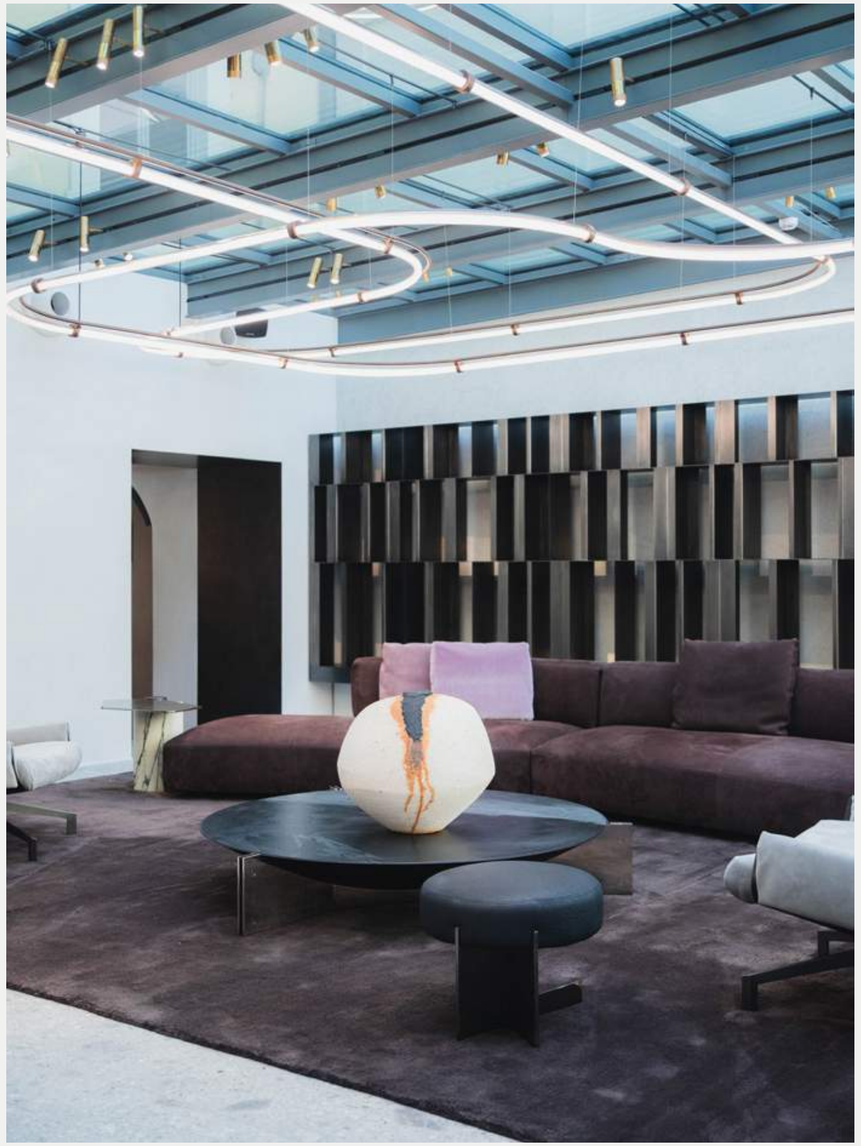

Is it truly possible to transcend the boundaries of matter? 'Beyond Matter' is a journey that captures your imagination and brings out your deepest emotions. It is an itinerary that caresses your soul and stimulates your senses, in a perpetual dance with beauty. Flowing, winding lines intertwine with sharp geometries and precious materials. Bold and decisive designs express so much personality, a unique paradigm of contemporary elegance. The creative harmony that exists between Henge and its designers, like Massimo Castagna, Ugo Cacciatori and Isabella Genovese, continues to weave together threads of innovation and a search for materials that goes beyond the ordinary. Henge is once again working with renowned design firm Yabu Pushelberg, further enriching the mosaic of ideas that contribute to Henge's unique vision.

'Beyond Matter' is an exploration of exceptional materials, gathered from every corner of the world, as Henge is continuously searching for their expressiveness, authenticity and the mysteries hidden in their processing techniques. Unique materials, each with a silent story, ready to be revealed to those who know how to listen. For Henge, every detail is an ode to perfection, and every creation is a profoundly meaningful experience, beyond the material.

We like to think about having no limits, letting our minds wander by being able to work with any material, any technology, and any shape using the production cycles that are dependent on our hands and limited only by our imaginations.

Origami, a skilfully crafted table, carries out the folding technique with great charm, just like that famous Japanese artistic composition.

Legacy, a symbol of innovation and design, envelops the room. This lighting system is capable of creating complex light grids, making the space look like a modern theatre of light and shadow, and a stage where light becomes the main character.

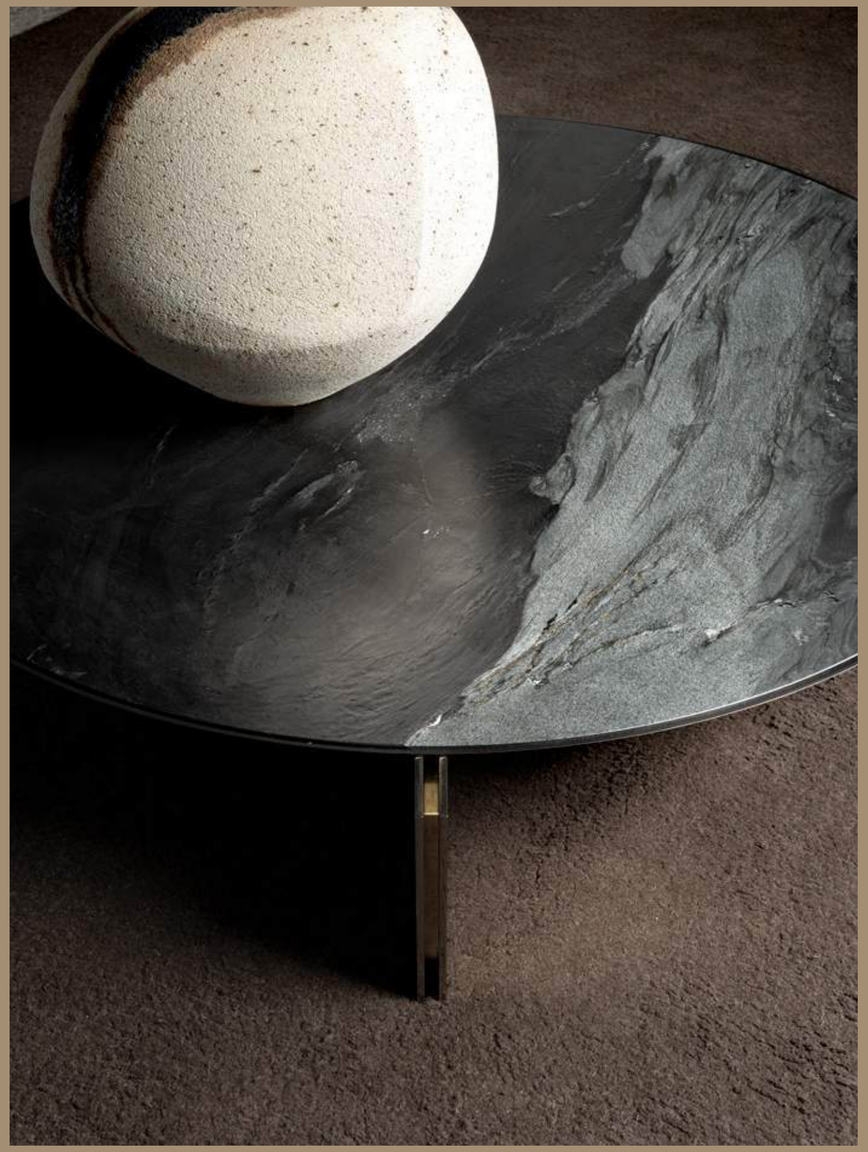

By abandoning traditional stylistic rules that feed into the conventional language of controlled shapes, the Muse coffee table favours the strong visual contrast of complementary combinations. Rigid, organic lines, metal and stone in melodious dissonance seductively celebrate the brand's dedication to being unique.
